Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, Claim 3 refers to a coupler volume but it is unclear from the specification what part of the device is the "coupler volume". It seems that the coupler volume is the same volume referred to as the booster chamber, but this is somewhat unclear. Also, the claim, as currently written, seems to say that the coupler volume is fed with fuel from the area closed by the moveable valve member. This is unclear because there are no defined gaps around element (63) and therefore no fuel can reach the booster chamber (72). The claim obviously needs to be rewritten so the language of the claim agrees with the specification and the specification may need further changes as well.
